Opportunità di collaborazione dalla rete Enterprise Europe Network

Novembre 2022

Ricerche Partner per Bandi Europei

FONTE: ENTERPRISE EUROPE NETWORK

1) Title	Consortium is looking for pilot hospitals in cities for the submitted project of the call HORIZON-MISS-2022-CIT-01-01 awaiting evaluation by the European Commission
POD Reference	RDRCH20221003013
Summary	A consortium with Swiss, UK and EU partners looks for pilot hospitals for a Horizon Europe project which is currently being evaluated by the European Commission. The project will deliver an emission free fuel by providing the pilots with hydrogen fuel at a fourth of the price of diesel. Vehicles (busses, cars, ambulance, drones, etc.) will be provided and tested at the pilot hospital site. The project HYDROEFFI plans to demonstrate a possible pathway to zero-emission mobility by 2030.
Deadline for EOI	30/11/2022
Deadline of the Call	30/11/2022

2) Title	Spanish Industrial company manufacturer of thermoplastic components for the automotive sector is looking for partners to participate in a Horizon Europe R&D project as a bio-polymer compounder or as an end user case.
POD Reference	RDRES20221013015
Summary	A Basque (Spanish) large industrial Company specialised in thermoplastic elastomers (TPE) and thermoplastic (TP) compounding for automotive components is looking for partners to build up a consortium to participate in a Horizon Europe R&D project for the call HORIZON-CL4-2023-TWIN-TRANSITION-01-42 and also HORIZON-CL6-2023-ZEROPOLLUTION either as a bio-polymer compounder (TPEs or TPs with ingredients non coming from fossil sources) and/or as an end user case of bio-polymeric research.
Deadline for EOI	28/11/2023
Deadline of the Call	30/12/2023

3) Title	PRIMA: AI-based cross-modality farming robot for pesticide-free agriculture – German university seeks farming companies from Southern Europe, Israel and / or Turkey to complete the consortium
POD Reference	RDRDE20220729010
Summary	A German university seeks partners from Southern Europe, Israel and/or Turkey to complete the consortium for a project for the next call Partnership for Research and Innovation in the Mediterranean Area (PRIMA). The objective is to use field robots to avoid the use of herbicides and in the long run reduce the use of insecticides. The partners should join the research consortium and have farmland where solutions can be implemented.
Deadline for EOI	29/11/2022
Deadline of the Call	28/02/2023

4) Title	A Slovak university is looking for partners and coordinating partners for HORIZON-CL5-2022-D3-03-01: Innovative components and/or sub-systems for CSP plants and/or concentrating solar thermal installations
POD Reference	RDRSK20220823006
Summary	A highly skilled team from Slovak university as one of the partners of project “StisolGen” is looking for coordinating partners and project partners as well. The aim of the project is to build an ecological electricity generator that uses the energy of the sun. The device will be built on the basis of a linear, parabolic concentrator of solar energy and a Stirling electric generator.
Deadline for EOI	30/12/2022
Deadline of the Call	09/01/2023

5) Title	Slovenian high-tech developer of innovative technology for soil remediation is looking for partners and is ready to join a consortium to apply for forthcoming Horizon Europe calls
POD Reference	RDRSI20220809012
Summary	Slovenian high-tech company has developed innovative solution for soil remediation, where toxic pollutants like lead and arsenic are removed from contaminated soil with up to 95 % efficiency. The technology enables soil for safe food production and it can be used in different sectors/environments. To further develop and upgrade the technology, the company is looking for companies, research institutions, and other industry partners to submit project proposals for forthcoming Horizon Europe calls.
Deadline for EOI	10/12/2022
Deadline of the Call	30/12/2022

6) Title	[Eureka or Eurostars3] A Korea SME is looking for for R&D partners to develop Marine Digital Twin or Marine Smart Service System based on long coverage maritime broadband communication technology
POD Reference	RDRSI20220809012
Summary	Eureka or Eurostars] A Korean SME has developed the maritime broadband wireless telecommunication solution which is more accessible regarding cost and quality compared to satellite internet near harbour. The company wants to utilize its technology for safety control and maintenance of ships and other remote assets such as off-shore plants. To apply for Eureka or Eurostars, the company is looking for R&D partners with technologies related to the 5G communication or marine IT services.

Deadline for EOI	31/10/2023
Deadline of the Call	31/10/2023

Ricerche di Partner Tecnologici e Commerciali

Presentiamo di seguito alcune opportunità di collaborazione internazionale pubblicate nella banca dati di Enterprise Europe Network.

Richieste e offerte di tecnologie

1) Title	Basque industrial company is looking for medical devices start-ups to accelerate their business by setting up manufacturing processes ISO 13485 and ISO 7 clean room compliance
POD Reference	TRES20221013014
Summary	Basque industrial company looks for medical devices start-ups to accelerate their business by setting up manufacturing processes ISO 13485 and ISO 7 clean room compliance. The industrial acceleration support consists in: - Turn key medical devices manufacturing and human resources required for its implementation - Investment in production processes - 500M2 clean room in 1.000M2 industrial building (optional expansion up to 3.000m2) - Global footprint support

2) Title	Dutch company seeks a partner to develop a cost prediction system with artificial intelligence to predict expansion costs for the construction of their fiber-optic network
POD Reference	TRNL20221102018
Summary	The Dutch company is in need of a cost prediction system that uses artificial intelligence (AI) technology to sort through the information that is available. They seek partners that can start small (Agile) and are willing to learn and develop together with the Dutch company. They offer a commercial agreement with technical assistance for potential partners that can develop a cost prediction system that uses AI.

3) Title	Gamification solutions sought by German logistics company
POD Reference	TRDE20221025021
Summary	A German logistics company seeks to implement gamification elements in processes for the improvement of employees' motivation and overall results. Sought are start-ups or young SMEs from the IT sector with an expertise in gamification solutions for technical cooperation agreements. Test runs and pilot application are possible on-site. Early stage seed capital is available. This request is part of an open innovation challenge in the context of the European Logistics Innovation Day (Dec 8 & 9)..

4) Title	IoT Device vendor looking to partner with Digital Health Platform and Service providers
POD Reference	TRCA20221024017
Summary	The company develops IoT devices utilizing low-power and long-range wireless technologies with a focus on respiratory health monitoring. Their devices are designed for 3-4 month battery life and no reliance on Wi-Fi or cellular infrastructure. They are looking to go-to-market with Digital

	Health Platform solution providers seeking reliable, accurate and scalable devices to feed valuable data into their platform.
--	---

5) Title	French company seeks European manufacturer of high-power directional couplers used in solid-state power amplifiers for radar, satcom and electromagnetic compatibility/immunity testing
POD Reference	TRFR20221011014
Summary	A French company has specialised in RF & microwaves components. The SME is looking for high-power dual directional couplers in order to associate with its own power combiners. The partner should design and/or produce high-power directional couplers ideally from 10kHz to 400 MHz, or up to 1GHz. The products must be ITAR-Free that is to say without any export restriction. A commercial agreement with technical assistance is sought with manufacturer of such components and located in Europe.

6) Title	Natural cooling solutions sought for homes to be sustainably renovated
POD Reference	TRNL20221003006
Summary	A Dutch housing corporation, with more than 4000 social rental homes, is looking for a solution that can ensure natural cooling of homes to be renovated in the coming years. Solutions for cooling homes that do not result from an additional installation, but which already prevent overheating in the design. Long-term partners, architects, construction engineers, installation-, climate- and landscape experts are sought, with innovative and integral solutions, who can also support the realization.

7) Title	Intelligent autonomous platform mobile ground robot 4x4 for multi-applications to automate day-night indoor/outdoor repetitive tasks of inspection, maintenance and logistics
POD Reference	TOFR20221107002
Summary	An official French distributor, expert in advanced European robotics and cobotics solutions, offers an adaptable mobile robot platform that can be equipped with specific modules (artificial vision, ...) and software for programming guidance routes. The SME is looking for companies, willing to simplify (digitise and automate) and insure traceability with mobile robot for their inspection, logistics or maintenance activities, for commercial agreements with technical assistance.

8) Title	Compact, lightweight & low-cost hydrogen fuel cell
POD Reference	TOCH20221102013
Summary	Swiss SME offers an innovative fuel cell (FC) technology, based on redesigned microstructure delivering a power density of 1.5-2 times that of leading competitors' FCs as well transformative assembly process reducing the cost. Application: Commercial vehicles on land/water that require extended use, range and heavy payloads like trucks, buses, trains, construction area, ferries etc. Agreements sought: Commercial with technical assistance, manufacturing and investment agreement.

9) Title	Bulgarian company who produces in-house transformers is looking for new clients and opportunities to develop novel combined products
POD Reference	TOBG20221108012
Summary	The company is specialized in the production of various types of transformers with power from 5VA to 100 kVA, as well as reactors, emergency power supplies, charging stations for traction batteries and metal parts. The accumulated experience from its founding in 1962 until now, in combination with the investments made in modern technological equipment, ensure the production of products of high quality and reliability at competitive prices.

10) Title	Spanish company expert in agroindustrial biomass upcycling strategies is open for collaboration in circular bioeconomy initiatives for the recovery of plant bioactive compounds
POD Reference	TOES20221108006
Summary	Spanish company from Madrid with expertise in the extraction, chemical characterization and purification of bioactive compounds from plants has developed an innovative business model for the extraction of bioactive compounds from by-products. The collaboration types they are interested in are manufacturing agreements and research cooperation agreements.

11) Title	Improved data transmission through glass fibers
POD Reference	TODE20221021005
Summary	Electrooptical mixers are optoelectronic components used in data transmission via optical fiber. The novel electro-optical mixer from a German university is switchable, smaller and offers improved noise performance, making it of interest to infrastructure equipment suppliers in telecommunications, among others. The university offers a license agreement and a technology cooperation agreement.

12) Title	SME specialised in robotics for the manipulation and assembly of miniaturised components is seeking technical cooperation with photonics industry
POD Reference	TOFR20221102008
Summary	The French company specialised in robotics has developed a strong know-how for the manipulation and assembly of miniaturised components. Since 2011, it has been working and developing knowledge in the field of semi-conductors and micro-electronics. The company would now like to extend its know-how, help the fast-growing photonics field by co-developing reliable and miniaturised products and preparing the tools everyone will need in the future.

Richieste e offerte di collaborazioni commerciali

1) Title	Romanian company specialized in manufacturing of handmade ice cream, seeks suppliers of raw material and equipment, for a supplier partnership agreement
POD Reference	BRRO20221108017
Summary	The Romanian company active in the production of handmade ice cream is interested in finding trading partners - suppliers and producers of raw material and equipment abroad for cooperation in the framework of supplier and manufacturing agreement.

2) Title	Slovak bakery is looking for suppliers of food ingredients and new partners
POD Reference	BRSK20221108024
Summary	A Slovak industrial bakery, focused on production of frozen pastries with sweet and salty fillings is looking for EU suppliers of food ingredients (frozen fruit and vegetables, oil, pizza paste, tomato paste, fillings).

3) Title	Danish SME are seeking manufacturers to produce lifejackets for watersports.
POD Reference	BRDK20221104003
Summary	Danish SME located in the Northern part of Denmark are looking for manufacturers to produce lifejackets for watersports. The life jacket is remarkable by being made of a flexible fabric (swimwear material), being manually inflatable, and placed on the upper chest, making it possible to wear while doing sports that requires great flexibility such as surfing. The Danish SME is looking for a manufacturing agreement.

4) Title	German online retailer is looking for metal companies to produce bird protection spikes under an outsourcing agreement
POD Reference	BRDE20221103015
Summary	A German mail order company, specialised in personalized gift items, household and garden products, would like to further expand their portfolio of different garden products. So they are looking for manufacturers or wholesalers who are able to produce bird protection spikes. Cooperation involves the conclusion either of an outsourcing or a commercial agreement.

5) Title	French company is looking for glass bottle suppliers for fruit juices, various non-alcoholic sparkling beverages and ciders
POD Reference	BRFR20221026005
Summary	A French company specialised in the production of fruit juices, ciders, non-alcoholic sparkling beverages as well as lemonades, beers and various sparkling aperitifs searches for glass bottle suppliers. The firm is interested in 1 L and 75 cl glass white bottle and 75cl glass green bottle.

6) Title	Slovak company producing ecological seed tapes made of ecological water-soluble foil is looking for wholesalers and companies that package chemicals using water-soluble films
POD Reference	BOSK20221108026
Summary	A Slovak innovative company producing a seed tape made of ecological water-soluble foil used as a carrier for precisely distributed seeds is looking for wholesale partners and companies that do packaging of chemicals using water-soluble films

7) Title	Polish innovative manufacturer of natural, mostly vegan and ecological cosmetics is looking for specialized distributors for natural cosmetics and offers distribution services agreement as well as manufacturing services.
POD Reference	BOPL20221108015
Summary	The Polish manufacturer of natural and handmade cosmetic products from the best ingredients is looking for established distributors to collaborate under distribution services agreement. The company is very interested in tailored manufacturing services.

8) Title	Ukrainian company specializes in the produce of exclusively natural treats, looking for importers and distributors in EU
POD Reference	BOUA20221108010
Summary	The mission of our brand is to make natural healthy food treats accessible to everyone. We do not use sugar, dyes, preservatives or flavor enhancers, just fruits and berries. Our manufacture is located in the ecologically clean region of the Ukrainian Carpathian Mountains, in the city of Ivano-Frankivsk. Berries and fruits are grown and harvested here, then we use to make Carpathians fruit rollups.

Chi fosse interessato a richiedere:
