Ricerche Partner per Bandi Europei

Fonte: ENTERPRISE EUROPE NETWORK

1) Title	Consortium is looking for pilot hospitals in cities for the submitted project of the call HORIZON-MISS-2022-CIT-01-01 awaiting evaluation by the European Commission
POD Reference	RDRCH20221003013
Summary	A consortium with Swiss, UK and EU partners looks for pilot hospitals for a Horizon Europe project which is currently being evaluated by the European Commission. The project will deliver an emission free fuel by providing the pilots with hydrogen fuel at a fourth of the price of diesel. Vehicles (busses, cars, ambulance, drones, etc.) will be provided and tested at the pilot hospital site. The project HYDROEFFI plans to demonstrate a possible pathway to zero-emission mobility by 2030.
Deadline for EOI	30/11/2022
Deadline of the Call	30/11/2022

2) Title	Development of new bimetallic catalyst in frame of doctoral network under Horizon Europe
POD Reference	RDRDE20220831006
Summary	Aiming to provide a broader perspective and to increase the employability of the doctoral candidates, the network, which focuses on the topic of Cooperative Catalysis, is looking for industrial collaborators (chemical industry and related) to become associated partners in the current HORIZON-MSCA-DN-2022-0-01 call. The doctoral candidates will gain practical experience during a secondment at one of the associated partner. Project coordinator is an institute for chemistry at a German university.
Deadline for EOI	30/10/2022
Deadline of the Call	15/11/2022

3) Title	PRIMA: AI-based cross-modality farming robot for pesticide-free agriculture – German university seeks farming companies from Southern Europe, Israel and / or Turkey to complete the consortium
POD Reference	RDRDE20220729010
Summary	A German university seeks partners from Southern Europe, Israel and/or Turkey to complete the consortium for a project for the next call Partnership for Research and Innovation in the Mediterranean Area (PRIMA). The objective is to use field robots to avoid the use of herbicides and in the long run reduce the use of insecticides. The partners should join the research consortium and have farmland where solutions can be implemented.
Deadline for EOI	29/11/2022
Deadline of the Call	28/02/2023

4) Title	A Slovak university is looking for partners and coordinating partners for HORIZON-CL5-2022-D3-03-01: Innovative components and/or sub-systems for CSP plants and/or concentrating solar thermal installations
POD Reference	RDRSK20220823006
Summary	A highly skilled team from Slovak university as one of the partners of project "StisolGen" is looking for coordinating partners and project partners as well. The aim of the project is to build an ecological electricity generator that uses the energy of the sun. The device will be built on the basis of a linear, parabolic concentrator of solar energy and a Stirling electric generator.
Deadline for EOI	30/12/2022
Deadline of the Call	09/01/2023

5) Title	Slovenian high-tech developer of innovative technology for soil remediation is looking for partners and is ready to join a consortium to apply for forthcoming Horizon Europe calls
POD Reference	RDRSI20220809012
Summary	Slovenian high-tech company has developed innovative solution for soil remediation, where toxic pollutants like lead and arsenic are removed from contaminated soil with up to 95 % efficiency. The technology enables soil for safe food production and it can be used in different sectors/environments. To further develop and upgrade the technology, the company is looking for companies, research institutions, and other industry partners to submit project proposals for forthcoming Horizon Europe calls.
Deadline for EOI	10/12/2022
Deadline of the Call	30/12/2022

Ricerche di Partner Tecnologici e Commerciali

Presentiamo di seguito alcune opportunità di collaborazione internazionale pubblicate nella banca dati di Enterprise Europe Network.

Richieste e offerte di tecnologie

1) Title	Natural cooling solutions sought for homes to be sustainably renovated
POD Reference	TRNL20221003006
Summary	A Dutch housing corporation, with more than 4000 social rental homes, is looking for a solution that can ensure natural cooling of homes to be renovated in the coming years. Solutions for cooling homes that do not result from an additional installation, but which already prevent overheating in the design. Long-term partners, architects, construction engineers, installation-, climate- and landscape experts are sought, with innovative and integral solutions, who can also support the realization.

2) Title	Looking for high-resolution 0.1 nephelometric turbidity unit (NTU) turbidimeters or probes for checking the level of water transparency in private house swimming pools
POD Reference	TRFR20220927021
Summary	A French company specialises in equipment for swimming pool for individuals. In order to reduce electricity consumption for cleaning water by filtration system, the SME needs to measure online small turbidity variations to inform the energy management unit to start or to stop the filtration. The SME seeks high-resolution turbidimeters or probes (0.1 NTU). A commercial agreement with technical assistance or a technical cooperation is sought with a long-term partner manufacturing such instruments.

3) Title	Austrian company active in the food industry seeks sustainable solutions for combusting a gas mixture and using the resulting heat in existing plants
POD Reference	TRAT20220915003
Summary	The company located in the region of Lower Austria produces and sells food products generated from processing fruit seeds. A solution is being sought to utilize a gas mixture (arising as waste product) in a combustion chamber. The goal is to make this gas stream harmless to humans and the environment. The company is looking for plant engineers who are experienced in gas combustion. A technical, a manufacturing or a research cooperation agreement is envisaged.

4) Title	Austrian research institute looking for partners in the field of neurorehabilitation using artificial environments like virtual reality, augmented reality and robots
POD Reference	TRAT20220728005
Summary	An Austrian research centre with expertise in stroke and vascular ageing neurorehabilitation - using virtual/augmented reality, robots and neuroimaging techniques - was recently created. The centre uses innovative approaches for an adapted and efficient improvement of patients' quality of life via neurocomputational modelling. The centre has connections to clinics and is now looking for private and public partners to collaborate on new technologies under a research and/or technical agreement.

5) Title	Innovative German nail cosmetic start-up is searching manufacturer for new individual nail polish bottles
POD Reference	TRDE20220719023

Summary	A small German start-up company seeks a partner to manufacture new nail polish bottles according to sustainability and new application requirements. The bottles should be made from glass and plastics but alternatives can be discussed. The partner should contribute to finalising the design and be in a position to manufacture small as well as large series. A manufacturing agreement should be concluded
---------	--

6) Title	Dutch social housing corporation is looking for solutions to reduce heatloss in façade openings as efficiently as possible.
POD Reference	TRNL20220926005
Summary	A Dutch social housing corporation is looking for partner who can offer solutions to reduce heatloss in façade openings as efficiently as possible. They are looking for partners that can offer a solutions or ideas (from TRL 5-8) to reduce heatloss on their housing stock.

7) Title	Spanish energy solutions development company offers its photovoltaic bifacial solar system technology for partners willing to collaborate under research cooperation or commercial with technical assistance agreements.
POD Reference	TOES20220818014
Summary	A Spanish based SME has developed a new bifacial photovoltaic (PV) system to increase the energy yield of PV installations, enhancing power generation profile and better electricity demand response minimizing the use of batteries. The technology provider is interested in collaborations with solar industry agents under research or commercial with technical assistance partnerships.

8) Title	Transparent photochromic material with fast light and colour control
POD Reference	TOES20220928003
Summary	A Spanish SME specialist in nanoencapsulation has developed a photochromic technology for fast transmitted light control. The materials obtained through this technology autonomously respond to UV light changing their colour and light transmission (%T) within seconds. This response is desired for lenses, eyewear and transportation glazing that adapt to changing weather and for smart windows for energy saving. Partners interested in commercial or R&D with technical assistance agreements are sought

9) Title	The University from Lithuania made tire textile fiber panels from recycled tires, which are intended to improve sound and heat insulation properties in premises.
POD Reference	TOLT20220929005
Summary	The University from Lithuania, which has 13 institutes, 3 research centers and 22 laboratories, has created and offer tire textile fiber panels from recycled tires. This technological solution improve sound and heat insulation properties in premises. University is looking for partners to work under a licensing agreement or technological cooperation agreement.

10) Title	French company offers disruptive real-time Magnetic Resonance Imaging (MRI) guidance solutions for manufacturers of thermal ablation systems and MRI accessories.
POD Reference	TOFR20220719017
Summary	The French company offers Software as a Medical Device (SaMD), intended to provide real time information during MRI-guided thermal ablation procedures. The fast image reconstruction and real-time 3D temperature mapping with motion corrections deliver clinical benefits beyond current care standards in cardiology, oncology and neurology. The French company seeks partners interested in using this technology in the framework of a commercial agreement with technical cooperation.

11) Title	A Korean company specialized in digital healthcare is seeking global partners for remote health monitoring solution using smartphone camera
POD Reference	TOKR20220930001
Summary	A Korean company specialized in digital healthcare has developed a health monitoring solution which can measure heart rate, blood pressure, stress and respiratory using a smartphone camera. This solution helps to measure health information without a pressure cuff or smartwatch. Any organisation in need of such a technology can be a potential partner.

12) Title	Virtual reality-based system for immersive therapy of patients with cognitive and motor impairments (stroke, paraplegia, Parkinson, multiple sclerosis)
POD Reference	TODE20220929017
Summary	A German SME has developed a portable virtual reality-based system used in neurological rehabilitation. Advantages include improved therapy results as well as time and cost savings for caregivers through higher-efficiency treatment. Healthcare companies are sought throughout Europe for distribution agreements. Also rehabilitation clinics, acute clinics, retirement homes and outpatient facilities can be partners in the framework of commercial agreements with technical assistance.

Richieste e offerte di collaborazioni commerciali

1) Title	Greek SME active in trading of specialised chemicals for various industrial sectors requests products to add to its range
POD Reference	BRGR20220927004
Summary	Greek SME active in trading of specialised chemicals for various industrial sectors requests products to add to its range

2) Title	Lithuanian wood processing company is looking for wood suppliers and partners
POD Reference	BRLT20221005001
Summary	A Lithuanian company is specialized in wood processing activities. As the business is expanding, the company is seeking wood suppliers and partners.

3) Title	A Spanish company is looking for manufacturers of metal parts (buckle belts) produced by MIM (Metal Injection Moulding)
POD Reference	BRES20221005011
Summary	A Spanish manufacturer of metallic components, accessories, bijouterie and jewellery for the luxury fashion industry is looking for suppliers of metal parts (stainless steel) for a buckle belt that the company is developing. The production must be carried out by the MIM (Metal Injection Moulding) process. The is looking for supplier agreements.

4) Title	Belgium company is looking for manufacturers of interior and/or exterior products for distribution in the European market.
POD Reference	BRBE20220929020
Summary	A Belgian commercial company is looking for an exclusive distribution agreement or an acquisition agreement. This company has a strong network in the interior & exterior finishing products and looks for a manufacturer of innovative products and this for both type of agreements. The expertise is the business & sales development, the brand promotion and this within the European market.

5) Title	Ukrainian company is looking for new licenses for the production of apple drinks (cider)
POD Reference	BRUA20220929019
Summary	The Ukrainian company is interested in expanding the range of refreshing drinks from apple juice. Now the company is actively produced the directly pressed apple juice. As part of its growth strategy into new international markets, the company would like to find experienced cider producers who would be interested in manufacturing and marketing its products under licence.

6) Title	An eco-friendly French SME is looking for foreign partners to supply of cotton-lined cork, vegetable fibers or cellulose fabrics to produce high-end vegan bags
POD Reference	BRFR20221006004
Summary	A French woman entrepreneur had a solid experience in a large luxury house as a leather goods maker. In 2019, she started her own activity on the basis of eco-responsibility, as designer and producer of leather goods and jewellery for men and women. She is currently looking for new suppliers of cotton-lined cork, vegetal fibers or cellulose in rolls in several colours. Manufacturers of such types of quality and natural materials, are sought as long-term partners under supplier agreements.

7) Title	The Polish company specialized in the production of atypical woodwork such as windows and doors intended for historic buildings is looking for partners to cooperation under manufacturing or subcontracting agreement.
POD Reference	BOPL20220928001
Summary	The Polish family business has been specializing in the production of atypical construction joinery for historic buildings for almost 30 years. Windows and doors are made by company on individually orders after agreeing all the details with the local conservator of monuments and architect. The company is interested in increasing sales and looking for partners in order to establish long-term cooperation.

8) Title	Greek company offers organic and inorganic fertilizers and soil improvers
POD Reference	BOGR20220927014
Summary	Greek company offers organic and inorganic fertilizers and soil improvers.
