Ricerche Partner per Bandi Europei

Fonte: ENTERPRISE EUROPE NETWORK

1) Title	HORIZON-CL6-2023-ZEROPOLLUTION-01 Clean environment and zero pollution - Bulgarian university is seeking partners
POD Reference	RDRBG20230203017
Summary	Bulgarian university with expertise in water and soil pollution is seeking partners for submission of a project proposal under HORIZON-CL6-2023-ZEROPOLLUTION-01 Clean environment and zero pollution or to join an already formed consortia
Deadline for EOI	09/03/2023
Deadline of the Call	27/03/2023

2) Title	HORIZON-CL4-2023-TWIN-TRANSITION-01-43 Industrial partners needing metal heating or scaling measurement are sought for a project with the objective to gradually substitute natural gas with hydrogen
POD Reference	RDRDE20230201008
Summary	A German university of applied sciences is planning to submit a proposal for HORIZON-CL4-2023-TWIN-TRANSITION-01-43. The project targets metal processing industry and aims at gradually substituting natural gas with green hydrogen. Industrial end users are sought.
Deadline for EOI	27/02/2023
Deadline of the Call	19/04/2023

3) Title	A Spanish company is looking for partners to launch a project proposal for the ERA-MIN3 2023 call
POD Reference	RDRES20230131013
Summary	A Spanish company, specialized in 3D graphic capabilities, AR/VR applications and point cloud technologies, is looking for partners to launch a project proposal for the ERA-MIN3 call. The profiles sought are industry, academic, or research organisations from the list of eligible countries in the ERA-MIN3 call with expertise in any of the following: exploration methods with different technologies, resource estimation and planning, applied 3D models.

Deadline for EOI	09/03/2023
Deadline of the Call	29/03/2023

4) Title	Waste valorization Spanish company is searching for a partner (to apply for a Horizon Europe call) as the end user of advanced biofuels and aromatic compounds produced in biomass industrial processes, in order to cover the entire value chain.
POD Reference	RDRES20221205026
Summary	Waste valorization Spanish company is searching for a partner (to apply for a Horizon Europe call) as the end user of advanced biofuels produced in biomass industrial processes, in order to cover the entire value chain. The partner will be preferably an industry, and will be involved in the characterization and validation of the fuel produced from a biomass pyrolysis process. A potential partner could also be a research institution or industry.
Deadline for EOI	27/02/2023
Deadline of the Call	31/03/2023

5) Title	Spanish Industrial company manufacturer of thermoplastic components for the automotive sector is looking for partners to participate in a Horizon Europe R&D project as a bio-polymer compounder or as an end user case.
POD Reference	RDRES20221013015
Summary	A Basque (Spanish) large industrial Company specialised in thermoplastic elastomers (TPE) and thermoplastic (TP) compounding for automotive components is looking for partners to build up a consortium to participate in a Horizon Europe R&D project for the call HORIZON-CL4-2023-TWIN-TRANSITION-01-42 and also HORIZON-CL6-2023-ZEROPOLLUTION either as a bio-polymer compounder (TPEs or TPs with ingredients non coming from fossil sources) and/or as an end user case of bio-polymeric research.
Deadline for EOI	28/11/2023
Deadline of the Call	30/12/2023

6) Title	A Finnish biotech company is looking for partners for Fungal Fermentation & Live Culture Formulation funding projects, including Eurostars and Horizon Europe
POD Reference	RDRFI20221128030
Summary	A Finnish company is specializing in fungal-based biotechnology. The project area aims to scale-up innovative, optimized and validated formulation methods of live fungal inoculants. Ideal potential partner(s) should be experts in live microbial culture formulations and capable of analytics in formulation viability and stability. Technological R&D partnership is sought after, for funding calls such as Eurostars, Horizon Europe and equivalents.
Deadline for EOI	22/03/2023
Deadline of the Call	12/04/2023

Ricerche di Partner Tecnologici e Commerciali

Presentiamo di seguito alcune opportunità di collaborazione internazionale pubblicate nella banca dati di Enterprise Europe Network.

Richieste e offerte di tecnologie

1) Title	Dutch candy-making company is looking for innovative solutions for ways of working with secondary and tertiary packing materials
POD Reference	TRNL20230127006
Summary	The Dutch company focus on finding innovative solutions of working with secondary and tertiary packing materials. Secondary packing materials are showboxes and other materials which are used to present the finished goods in the stores. Tertiary packing materials are outer cartons and all packing materials used for transporting the finished products from the factory towards the customers/distribution centers.

2) Title	A company from Lithuania is looking for technology solution for using textiles left over from production processes.
POD Reference	TRLT20230130003
Summary	SME from Lithuania is looking for technology solution for using textiles left over from production processes. the sought-after technological solution will help to use unused textile materials.

3) Title	Electronics manufacturer sought to validate novel liquid cooling concept for electronic control units to be used in future mobility concepts and other sectors
POD Reference	TRDE20230116006
Summary	A German automotive supplier seeks manufacturers of electronics to validate a novel liquid cooling concept for electronic control units. The prototype answers the growing demand for heat dissipation due to electrification and autonomous driving functions. Advantages are reduced weight (-35%), less space (-50%) and improved cooling (+10%). Partners are sought to test the prototype (TRL5) to bring it to market maturity and possibly act as a sales partner.

4) Title	Swedish printing company looking for manufacturers of residual products
POD Reference	TRSE20230113013
Summary	A Swedish company, having a goal/vision to be the most sustainable printing company in Sweden. They are looking for a partner who can help them to develop their idea about taking advantage of wastepaper and turning it into a new material – cloth paper. They have their ideas about upcycling it into new products; cardboard for the construction industry, food packaging, or hygiene paper. They are looking for expertise and collaboration in materials based on paper and textile fiber.

5) Title	Dutch company seeking material innovation for oven-safe, reusable food container
POD Reference	TRNL20230109003
Summary	The SME from the Netherlands is a circular economy company active in food packaging. The company replaces disposable food containers with reusables. In the transition to a zero waste economy, the company is looking for an invention or presentation of a material that can replace the disposable ready-to-consume food containers found in grocery stores.

6) Title	A Dutch transport company is looking for a conclusive system to check, scan and control what is loaded in ferry trailers
POD Reference	TRNL20230110003
Summary	This young Dutch company based in the Rotterdam area is specialised in transport between UK and EU. To ensure the content of the load the company is looking for a system that proves what and how much is loaded in the ferry trailers. Therefore the company is looking for partners that offer solutions in the framework of a commercial agreement with technical assistance or a research and development agreement.

7) Title	German university is looking for companies willing to engage in application-oriented research in the digitalisation of industrial services.
POD Reference	TODE20230202012
Summary	A research group from a German university working on digitalisation in industrial services with focus on remote augmented reality in field services, business models for Industry 4.0 and predictive maintenance is seeking industrial companies from the mechanical and plant engineering sector for research and development cooperation agreements.

8) Title	Compact hybrid micro power plants for all year-round sustainable energy generation based on wind and solar
POD Reference	TOCH20230201011
Summary	The plug & play micro power plants generate green electricity locally from the combination of high-performance wind dual turbines and solar panels mounted on a flexible wooden structure, which can be easily installed on roof tops of homes and commercial buildings and allow the production/generation of clean green energy in summer and winter, day and night, also in bad weather conditions. The Swiss company is looking for investments and for commercial agreements with technical expertise.

9) Title	An underwater inspection and maintenance robot for ships and offshore infrastructure
POD Reference	TOGB20230131020
Summary	A UK company has developed and validated a robotic platform crawling complex underwater objects such as ship hulls, turbine foundations etc. It carries built-in and optional tools for weld inspections, monitoring, water jetting, maintenance etc. Businesses and departments doing inspection and maintenance jobs in oil and gas, wind and ship care sectors are sought for commercial agreements with technical assistance.

10) Title	Colour changing elastomers for the visual detection of deformation or damage
POD Reference	TOCH20230125010
Summary	A Swiss university offers a method for the design & fabrication of elastomer that change colour upon deformation. It allows control of the elastomers colour using readily available raw materials. Application could be displaying messages on soft screens, highlighting touch points in tactile sensors or reporting motion as sleeves around robotic joints i.e for detection of critical deformation. licensing agreement with manufacturers of elastomers interested to functionalize their product is sought

11) Title	Post-processing of complex shaped, additive manufactured parts with high demands on accuracy and surface integrity
POD Reference	TODE20230124007
Summary	A German university develops process chains, technologies and tools for micro and precision manufacturing. In addition to the production of components with dimensions on a µm-scale, a main topic is the specific functionalization of surfaces in terms of surface quality and chemical-

	physical properties. Contacts are sought with industry and research institutes from the field of additive manufacturing (AM). In particular, R&D agreements with focus on post-processing of AM parts are of interest.
--	--

12) Title	The technology of internal stress control in critical elements of metal structures
POD Reference	TOUA20230120015
Summary	A Ukrainian university offers a technology for measuring internal stress in critical elements of metal structures under load using the holographic interferometry method. The technology makes it possible to record the stress changes with an accuracy of 1-3% of Young's modulus of the metal and monitor the working condition of the critical elements. They are looking for partners to finalize the technology for various metals and alloys and to produce compact sensors based on the technology.

Richieste e offerte di collaborazioni commerciali

1) Title	Hungarian company is looking for partners selling or manufacturing home and garden products, horticulture products, tools, workwear etc. to represent on the Hungarian market within the framework of a commercial or supplier agreement.
POD Reference	BRHU20230124015
Summary	Hungarian company is looking for a reliable partner with good quality products, which it could represent on the Hungarian market. The company's interests are mainly home and garden products, horticultural products, tools etc. The company sells these products both wholesale and retail. On their wholesale chain the company covers about 1000 farmer shops and stores in the country. They also have 9 own farmer shops where they sell a wide range of gardening products.

2) Title	Luxembourgish trading company is looking to import building materials, especially in construction panels, flooring and timber sectors under distribution services or commercial agency agreements.
POD Reference	BRLU20230130011
Summary	A Luxembourg company active in the import and selling of building materials is looking to expand its product catalogue. Having an important network in Luxembourg, Belgium, Netherlands and France, it is looking to expand its international network of suppliers. It requests cooperation under distribution services or commercial agency agreements with manufacturers able to provide interesting, innovative and niche construction panels, flooring and timber products interested in the mentioned markets.

3) Title	A French company specialized in physical security products is looking for manufacturers of armoured steel and glass doors for a manufacturing and distribution agreement.
POD Reference	BRFR20230124022
Summary	A French company specialized in physical security products for the protection of goods and people is looking for new suppliers or manufacturers of armoured steel and glass doors through a manufacturing and distribution agreement. All products must be conformed to the European standards.

4) Title	German company seeks disposable menu boxes for takeaway food (preferably sustainable, made of sugar cane) as well as tinfoil, cling film, pizza boxes and frying fat (semi-liquid or liquid).
POD Reference	BRDE20230118005
Summary	A German food company supplies supermarkets, restaurants and catering companies with nearly 100 products (e.g. can foods, rice, cheese, packaging items), it is now looking for suppliers of menu boxes for takeaway meals, preferably made from sugar cane. It is also looking for tinfoil,

	cling film, pizza boxes and frying fat (semi-liquid or liquid).
--	---

5) Title	A Japanese distributor for hardware is seeking a partnership with EU manufacturers of products that can be sold in home improvement stores
POD Reference	BRJP20230127004
Summary	A Japanese distributor for hardware, DIY (Do It Yourself)-related tools and products, machinery tools, pet supplies and camping equipment seeks a partnership with EU manufacturers who can provide a stable supply of EU-made hardware products such as fasteners and building materials, under commercial agency or distribution services agreements. Type of Partnership Considered

6) Title	Israeli developer and manufacturer of food supplements is looking for distributors
POD Reference	BOIL20230105018
Summary	This Israeli SME specializes in technological development and production of food supplements, vitamins and minerals under high quality international standards. The company has developed vegetable soft gel capsules enabling the entrapment of liquid or semi liquid substances. It has also developed an innovative multivitamin chewing gum that contains high dosages of active ingredients. The company is looking for distributors under a distribution services agreement.

7) Title	A technology company expert in compressed air solutions for operation stability & energy efficiency is looking for partners who can spread our technology to factories, power plants, and any other application of compressed air.
POD Reference	BOIL20230201013
Summary	An Israeli innovative solution for large machinery in the industrial sector seeks to extend the business opportunities in new territories, after receiving EU certification for the product (key industries- steel, cement, food and beverage and more). The solution offers significant electricity savings and improvement in the production yield. The company interested in partnership agreement with agents, distributors, and contractors across Europe, that familiar with the customers environment.

8) Title	Polish manufacturer of sauces, marinades, flavour butters and spices for food producers is looking for partners to work under commercial and outsourcing agreement.
POD Reference	BOPL20230130006
Summary	Polish company founded in 1996 produce sauces, marinades, flavour butters, spice and herbal mixtures for butchers, dairies and other food processing companies. Ready sauces are sold in packaging of various weights - sachets, cups, 3D monodoses and packing spice blends in HoReCa packages. The company is looking for partners to establish cooperation under outsourcing and commercial services agreement.
