Ricerche Partner per Bandi Europei

FONTE: ENTERPRISE EUROPE NETWORK

1) Title	HORIZON-CL4-2022-DIGITAL-EMERGING-02: seeking for partners from Industry and Academia from EU 27, UK, and Norway
POD Reference	RDRHR20220510003
Summary	For the purpose of the Horizon Europe Framework Programme (HORIZON)- Call Digital and emerging technologies for competitiveness and fit for the green deal (HORIZON-CL4-2022-DIGITAL-EMERGING-02) company is searching for strong partners to complete consortium for the following fields: AI/ML/data science, electricity distributor until 100 kV, university for advanced physics and dissemination of the project results, top player from the polymer industry and a high voltage testing laboratory.
Deadline for EOI	30/07/2022
Deadline of the Call	15/10/2022

1) Title	HORIZON-CL4-2022-DIGITAL-EMERGING-02: seeking for partners from Industry and Academia from EU 27, UK, and Norway
POD Reference	RDRHR20220510003
Summary	For the purpose of the Horizon Europe Framework Programme (HORIZON)- Call Digital and emerging technologies for competitiveness and fit for the green deal (HORIZON-CL4-2022-DIGITAL-EMERGING-02) company is searching for strong partners to complete consortium for the following fields: AI/ML/data science, electricity distributor until 100 kV, university for advanced physics and dissemination of the project results, top player from the polymer industry and a high voltage testing laboratory.
Deadline for EOI	30/07/2022
Deadline of the Call	15/10/2022

2) Title	Partners sought for EUROSARS project: Development of an AI System for the selection of relevant studies and the extraction of data for the registration of chemicals and products according to REACH.
POD Reference	RDRDE20220224009

Summary	A German start-up company specialized in AI research & application has teamed up with a contract laboratory, specialised in (ecotoxicological) assessment of nanomaterials in order to develop an AI tool for extracting information from documents in natural language (i.e. scientific publications or abstracts). In addition, an online database on ecotoxicological endpoints of nanomaterials shall be established.
Deadline for EOI	14/08/2022
Deadline of the Call	14/09/2022

3) Title	Eurostars – End-user or manufacturer of aluminium parts sought for a Eurostars project aiming at improving material performances thanks to clean micro-arc oxidation processes
POD Reference	RDRFR20220425017
Summary	A French SME specialised in micro-arc oxidation (MAO) coating allowing industrial aeronautical parts to reach high mechanical and chemical properties intends to adjust this REACH-compliant process to other sectors. The company is looking for a end-user partner to submit an Eurostars proposals aiming at adjusting the process to parts dedicated to other applications: Transportation, medical, hydraulics...
Deadline for EOI	31/07/2022
Deadline of the Call	14/09/2022

4) Title	Eurostars 3 - Development of AI-based interactive real-time automatic fault diagnosis technology
Summary	A Korean company is going to conduct advanced R&D to expand the range of applications for its automatic machine fault detection data analysis technology. Therefore, a company that has experience in dealing with big data especially voltage and current(electric) data and developing fault prediction algorithms is sought after for the purpose of developing a machine abnormality and fault predictive maintenance solution for machinery. In particular, solution providers with experience in anomaly detection and predictive diagnosis using current and voltage data, or a university R&D team researching related A.I technologies.
Deadline of the Call	15/09/2022

5) Title	Eurostars 3 - Implementation of smart local energy communities (LECs) enhancing energy flexibility and interoperability in ports facilities
Summary	The project scope of a Spanish company focuses in the creation of local energy communities (LECs) to produce renewable energy in site, enhancing the energy innovation and sustainability in the ports to convert them more energy independent and net zero emissions related to their main activities at facilities. Feasibility studies will be done to determine technology implementation like PV Solar, Smart grids, green H2, energy storage systems (ESS), Smart Buildings, CHP, etc). Looking for partners for the development of interconnection via ICT platforms and digital twin studies to control and test the LECs with AI, ML algorithms. Looking for partners to develop new business models creation and financial schemes for energy transfers between participants will be studied to check the potential Use Cases in the selected locations for these LECs engaging the related prosumers, aggregators and users.
Deadline of the Call	15/09/2022

6) Title	Partner search for an Erasmus plus project to create the rural innovator profile. vocational training centres, business associations, designer associations, universities, NGOs.
POD Reference	RDRES20220530002
Summary	A Spanish regional public body is preparing an Erasmus Plus project aimed to define training

	resources to create a new professional profile, the rural innovator, to address economic, social and environmental challenges of the rural environment. It is searching for partners to collaborate to identify skills and training needs, define new courses and extracurricular activities and test them through pilots.
Deadline for EOI	04/07/2022
Deadline of the Call	14/07/2022

Ricerche di Partner Tecnologici e Commerciali

Presentiamo di seguito alcune opportunità di collaborazione internazionale pubblicate nella banca dati di Enterprise Europe Network.

Richieste e offerte di tecnologie

1) Title	German industrial developer start-up of recyclable and reusable plastic packaging seeks machine builder to develop and build production unit together.
POD Reference	TRDE20220217020
Summary	A German start-up developed a novel plasma barrier coating for mono-material plastics, which can provide the same functional properties as a multi-material approach in terms of barrier and chemical resistance, but it is less expensive and fully recyclable. To be able to take the next step towards further industrialization of their pilot machine, the company is looking for a technical cooperation agreement with a cooperation partner for joint development.

2) Title	Technology for using mineral wastes as raw materials for additive manufacturing of cement and concrete
POD Reference	TRES20220531012
Summary	A Spanish Technological Center leader in the development and implementation of new technologies for the non-energy mining sector is looking for EU organizations with expertise in the application of imaging spectroscopy techniques for the location and evaluation of abandoned mine sites in order to map mineral potential for recycling purposes for mapping the spatial distribution of mineral compositions in order to reach a research cooperation agreement.

3) Title	Generation of renewable energy on building, head office of dutch corporate bank
POD Reference	TRNL20220601014
Summary	A corporate dutch company is committed to increase its share of self-generated renewable energy in an (inventive) way to be implemented in its head office in Utrecht. The goal is to produce renewable energy in/with the head office, instead of consuming energy. For this challenge, the company is looking for suitable (innovative) solutions that can be integrated in their head office towers.

4) Title	Experts in Artificial vision to be implemented in the crushing stage of an aggregates company to minimize energy requirements
POD Reference	TRES20220531015

Summary	A Spanish Technological Center is looking for organizations with expertise in artificial vision to be implemented in the crushing stage of an aggregates company to minimize energy requirements. The aim is to have an automatic tool which can detect granulometry and be able to define which elements should (product) or should not (waste) access to crushing equipment's. This is a cycle process and depends on final expected granulometry. The Center wants to reach a research cooperation agreement.
---------	--

5) Title	IT company is seeking manufacturers of high-quality batteries and powerbanks
POD Reference	TRHR20220509016
Summary	The Croatian-based company was founded in 2007. The primary focus is on IT solutions (In house solutions and Custom made solutions). In the process of implementing IoT solutions in business models as well. In IT sector they have made a huge impact in the Croatia market-creating over 200 satisfied customers while keeping constant growth over last 15 years. They have 26 employees, spreading from developers, technical support, sales, marketing, engineering, etc.

6) Title	Romanian manufacturer of cream spreads based on oleaginous fruits seeks technology to automatize its manufacturing process (processing and cooking) under commercial agreement with technical assistance
POD Reference	TRRO20220418001
Summary	A Romanian company manufactures an assortment of cream spreads based on the following oleaginous fruits: hazelnuts, pistachio, cashews, almonds, and peanuts. The company's products are manufactured using semi-automatic processes, from high-quality natural ingredients. The company aims to triple its manufacturing capacity and is therefore interested in identifying new technology to automatize its manufacturing processes, namely the oleaginous fruits processing and cooking.

7) Title	A German university institute is looking for licensing and research cooperation partners for their newly developed sensors and bridge circuits
POD Reference	TODE20220531006
Summary	A renowned German university institute is active in the field of measuring and control technologies. The institute developed a novel process for the predefined adjustment of individual sensors and bridge circuits. With this process, the sensors can be specifically adjusted to a predefined value even during a production process. The institute is looking for research cooperation partners and suitable industrial partners for the licensing of the patented invention.

8) Title	French pharmaceutical company specialized in innovative topical formulation and CRO services is looking for new research cooperation agreements
POD Reference	TOFR20220530019
Summary	The French contract research organization (CRO), based in Sophia Antipolis, is providing R&D services for the development and production of topical medicines. The SME benefits from International certifications, experienced staff and modern laboratories that ensure a high level of expertise and efficacy. The company is looking for new long-term research cooperation agreements with pharmaceutical companies and biotech companies around the world.

9) Title	High-hard and protective coatings on aluminum alloys by microarc oxidation (MAO)
POD Reference	TOUA20220530017
Summary	Ukrainian university offers technology for applying high-hard and protective coatings on aluminum alloys by micro-arc oxidation (MAO). The environmental friendliness of the method and the possibility of its use in various industries deserve great attention. The University is looking for industrial partners from the scientific community and is open to agreements on research and technical cooperation.

10) Title	Pilot-projects sought for evidence-based chronic care management platform for medical exercise and digital rehabilitation.
POD Reference	TOSE20220530010
Summary	A Swedish startup has developed a chronic care management platform for medical exercise and digital rehabilitation. The platform allows healthcare providers to instantaneously prescribe diagnosis-specific physical activity and digital rehabilitation to patients with chronic diseases. They are now looking for pharma companies and healthcare providers for pilot projects in order to see how patients with chronic health conditions respond to medical exercise during their medical treatment.

11) Title	A Dutch chemical company is offering tailor-made catalyst and solutions for industries and companies
POD Reference	TONL20220530009
Summary	A Dutch company offers custom-made catalysts for sustainable processes involving hydrogen storage as well as carbon capture and utilisation. The company is looking for cooperation projects involving product-, process- and technology development and for commercial agreement with industries and companies. A research and development agreement or commercial agreement with technical assistance is foreseen.

12) Title	A Spanish company offers flight controllers and professional components for eVTOLs & Urban Air Mobility, under commercial agreements with technical assistance
POD Reference	TOES20220530007
Summary	A leading Spanish company in the Urban Air Mobility (UAM) sector is offering autopilots and related components for eVTOLs, air taxis and heavy cargo drones. These components can be applied in vehicles to deploy both civil or military applications. The Spanish SME is offering these products under commercial agreements with technical assistance.

Richieste e offerte di collaborazioni commerciali

1) Title	Polish company seeks suppliers of medical devices and innovative cosmetics under distribution services agreement
POD Reference	BRPL20220531017
Summary	A Polish manufacturer of medical devices and natural cosmetics is willing to enlarge its portfolio and is looking for foreign suppliers of medical devices and natural cosmetics. Cooperation based on the distribution services agreement with exclusive rights to sell products on Polish market is considered.

2) Title	Spanish SME is looking for high-end swimsuits manufacturers
POD Reference	BRES20220527009
Summary	A Spanish SME located in the city of Barcelona seeks for manufacturers to produce swimsuits for children. The product must be made of microfiber and with a weight between 210gr and 215 gr.

3) Title	A cleaning house from Lithuania is looking for used industrial laundry and cleaning machines under a supplier agreement
POD Reference	BRLT20220525016
Summary	The Lithuanian company is providing laundry and cleaning services for business and private clients. The company is looking for used industrial laundry and cleaning machines (for washing, drying, ironing, etc.) suppliers. Cooperation under a supplier agreement is offered.

4) Title	Dutch SME is looking for food producers and especially soy sauce, soy drink and/or soybean oil producers
POD Reference	BRNL20220603009
Summary	A young Dutch company is looking for food producers and specifically producers of soy sauce, soy drink and/or soybean oil in Europe, who want to upcycle their food side-streams into valuable ingredients using the SMEs patented technology. The company is open to license the technology or discuss other types of sustainable cooperation.

5) Title	Dutch producer of electrical transporter vehicles is looking for potential outsourcing partners or joint venture or take over candidates
POD Reference	BRNL20220602014
Summary	The Dutch organisation is the producer of a collection of electrical transportation vehicles for people and goods in all sorts of terrain. The vehicles typically have a maximum speed of up to 60 km/h and a range up to 80 kilometers. The company is looking for partners to outsource some of its production to, but is also interested to find partners to enter into joint venture or even a take over.

6) Title	A Ukrainian producer of soft packaging (big bags) is looking for distributors
POD Reference	BOUA20220530013
Summary	The Ukrainian company is one of the leading manufacturers in Ukraine of soft packing and transportation products – polypropylene containers Big-Bag, as well as inserts for the transportation of bulk goods in open-top wagons and marine containers. The company is interested in enlarging its sales and is looking for partners under distribution services agreement.

Chi fosse interessato a richiedere:

- maggiori informazioni sui profili tecnologici e commerciali in evidenza in questo numero
- la segnalazione di ulteriori profili sulla base di specifiche esigenze
- l'inserimento di propri profili tecnologici e/o commerciali
